DETAILED ACTION

Claim Rejections - 35 USC § 102

- 1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25, 28, 30 and 34 are rejected under 35 U.S.C. 102 (e) as being anticipated by Santoianni et al. (U.S.6,270,476).

Santoianni et al show in figs 6 and 6a, a device having all the limitations of claims 25, 28, $\gamma_1 \, \stackrel{\sim}{\mapsto}_1 \, \stackrel{\sim}{\leftarrow} \, \stackrel$

Regarding claim 31, wherein the deformation of the second portion of the male thread inhibits rotation of the first member relative the second member (abstract and col. 10, lines 24-36).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

manner in which the invention was made.

Art Unit: 3731

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

Claims 32-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Santoianni et al. (U.S.6,270,476).

3. Regarding claims 32-33, Santoianni et al disclose substantially limitations as recited in the claim, except for the thread includes a different thread pitch and a different thread size. It would have been obvious matter of design choice to one skilled in the art at the time the invention was made to construct the thread of Santoianni et al device with a different thread pitch and a different thread size, since applicant has not disclosed that doing so which solves any stated problem or is anything more than one of numerous shapes or configurations a person ordinary skill in the art would find obvious for the purpose of providing with a different thread pitch and a different thread size. In re Dailey and Eilers, 149 USPQ 47 (1966).

Response to Amendment

4. Applicant's arguments filed 06/09/2003 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 25, 28, and 30-34 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
